## **Mac to Kindle: Secrets and Lies of Successful Formatting** Michael L. Kent

I cannot emphasize this enough, it is absolutely unnecessary to learn HTML if you want to format a beautiful book on Kindle! All you need is a program that will save documents in Microsoft Word (.doc) format. E-publishing is the wild west of book publishing. Although there are many books available about how to format Kindle books for PCs, there are few if any Mac books available. Many of the instructions about how to format and upload content for the Kindle are just plain wrong; even the instructions on Amazon mistakenly tell you to use HTML. In this comprehensive manual, Kent talks about basic design and formatting issues, advanced formatting, issues, what is possible in a Mac–Kindle formatting world, and how to produce a compelling e-book using only a Mac computer and Microsoft Word (or any word processing program like Pages that will save in Word). Using a Mac for Kindle: Secrets and Lies of Successful Formatting is a must have for any new Kindle publisher and will also teach old hands a thing or two.
