Proceedings of the Second ISAAC Congress - Volume 1 and Volume 2 (International Society for Analysis, Applications and Computation Volume 7/8) Robert P. Gilbert

The emphasis of the two volumes is on complex analysis with classical topics such as value distribution, and modern topics such as complex dynamics, both in one and several complex variables; the application of complex analysis to partial differential equations and integral equations and its generalization to quaternionic and Clifford analysis; new results from real and functional analysis, numerical and computational mathematics; and areas in applied mathematics such as acoustics and computational biology.

Audience: Researchers, especially those working in real and complex analysis, in numerical analysis, and in mathematical physics.
