## NFPA 780 - Standard for the Installation of Lightning Protection Systems, 2014 Edition NFPA

The 2014 NFPA 780 responds to industry developments with added coverage of new topics to increase protection against dangerous lightning hazards. Fully updated to reflect the latest protection methods, devices, and safety challenges, the 2014 NFPA 780: Standard for the Installation of Lightning Protection Systems is essential for designers, installers, insurance professionals, AHJs, and anyone responsible for protecting lives and property from fire and related dangers associated with lightning events. Be prepared to improve safety with vital changes and improved organization, including: Better alignment of requirements for strike termination devices. Consolidation of bonding requirements. New section addresses the use of fixed metal objects on buildings that have movable or rotating metal components, such as construction cranes, wind socks, observatories/telescopes, traffic cameras, radar dishes, photovoltaic arrays, and opening skylights. New section addresses retroactivity for NFPA 780.. New Chapter 11 presents lightning protection criteria and guidance for airfield lighting circuits. Aligned with federal aviation requirements, it provides a thorough look at design and installation of lightning protection systems to afford protection to these open areas.. In response to the continuing demand for renewable and alternative energy sources, a new chapter addresses lightning protection systems when solar systems and arrays are provided.. The requirements pertaining to catenary systems have been reviewed and significant annex material provided to clarify computations for applications with metal or wood poles. Make sure your knowledge is up-to-code so you're fully prepared to reduce lightning risks. Trust your jobs to the 2014 NFPA 780.
