New Standard Model for Elementary Particles

Richard Lighthouse

New Standard Model for Elementary Particles Richard Lighthouse

This short technical paper presents a new standard model for Elementary Particles. All elementary particle masses are related by simple math. This math is similar to the math used for wifi signals and it is called 1024-QAM. The 1024-QAM table graphically displays how all elementary particles are related, similar to the Standard Periodic Table in chemistry. If we line up all of the particle masses in order, we find there are a number of “gaps.” These are called the mass gaps, and they line up perfectly with 1024-QAM, which fits the sequence of elementary particle masses. Supersymmetry (SUSY) is also found to occur with 1024-QAM. Mass Groups 1 thru 8 have heavyweight counterparts which are found in Mass Groups 9 thru 16. 4 new particles are predicted to be discovered between 1 to 15 TeV. Also, 4 new particles are predicted to be discovered between 50 to 200 TeV. 4 new particles are predicted between 1 to 30 PeV. Numerous other new particles are predicted using 1024-QAM. This ebook provides compelling evidence that our universe is blinking at a high frequency. That frequency is estimated to be 1.039 THz.

From reader reviews:

Terry Sugg:

Book will be written, printed, or illustrated for everything. You can realize everything you want by a e-book. Book has a different type. As it is known to us that book is important thing to bring us around the world. Close to that you can your reading expertise was fluently. A guide New Standard Model for Elementary Particles will make you to always be smarter. You can feel a lot more confidence if you can know about everything. But some of you think that open or reading some sort of book make you bored. It's not make you fun. Why they are often thought like that? Have you looking for best book or appropriate book with you?

Diane Gonzales:

What do you think about book? It is just for students since they are still students or that for all people in the world, what the best subject for that? Just you can be answered for that query above. Every person has distinct personality and hobby per other. Don't to be obligated someone or something that they don't want do that. You must know how great as well as important the book New Standard Model for Elementary Particles. All type of book could you see on many options. You can look for the internet options or other social media.

Jeremy Jones:

This New Standard Model for Elementary Particles tend to be reliable for you who want to be considered a successful person, why. The key reason why of this New Standard Model for Elementary Particles can be on the list of great books you must have will be giving you more than just simple examining food but feed a person with information that maybe will shock your prior knowledge. This book is definitely handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed versions. Beside that this New Standard Model for Elementary Particles giving you an enormous of experience such as rich vocabulary, giving you trial of critical thinking that could it useful in your day action. So , let's have it appreciate reading.

Ruth Zimmer:

What is your hobby? Have you heard that question when you got scholars? We believe that that question was given by teacher to the students. Many kinds of hobby, Everyone has different hobby. And you know that little person just like reading or as studying become their hobby. You need to understand that reading is very important and also book as to be the thing. Book is important thing to add you knowledge, except your personal teacher or lecturer. You discover good news or update regarding something by book. Many kinds of books that can you take to be your object. One of them is New Standard Model for Elementary Particles.
