"Moments That Matter" is an essay series which provides short Bible-based answers to the important spiritual questions in people's lives.

There are two theories about origins. Those views are not compatible. One must be true. One must be false. The conclusion that we draw from the available evidence will lead us down one of two opposing paths about our purpose for living and even the worth of life.

Those two theories are examined in "Creation or Evolution - Which?" This essay is the second part of a two-part introduction to the differences in these two world views. This second part asks and answers the question, "Is evolution a fact of science?"

This discussion is one that every person must consider at some point in his life. If you have never taken a moment to open your mind to the evidence, this essay will provide one moment in your life that will truly matter.
