Introduction to Statistical Relational Learning (Adaptive Computation and Machine Learning series)

Introduction to Statistical Relational Learning (Adaptive Computation and Machine Learning series)

Handling inherent uncertainty and exploiting compositional structure are fundamental to understanding and designing large-scale systems. Statistical relational learning builds on ideas from probability theory and statistics to address uncertainty while incorporating tools from logic, databases and programming languages to represent structure. In Introduction to Statistical Relational Learning, leading researchers in this emerging area of machine learning describe current formalisms, models, and algorithms that enable effective and robust reasoning about richly structured systems and data. The early chapters provide tutorials for material used in later chapters, offering introductions to representation, inference and learning in graphical models, and logic. The book then describes object-oriented approaches, including probabilistic relational models, relational Markov networks, and probabilistic entity-relationship models as well as logic-based formalisms including Bayesian logic programs, Markov logic, and stochastic logic programs. Later chapters discuss such topics as probabilistic models with unknown objects, relational dependency networks, reinforcement learning in relational domains, and information extraction. By presenting a variety of approaches, the book highlights commonalities and clarifies important differences among proposed approaches and, along the way, identifies important representational and algorithmic issues. Numerous applications are provided throughout.

Lise Getoor is Assistant Professor in the Department of Computer Science at the University of Maryland. Ben Taskar is Assistant Professor in the Computer and Information Science Department at the University of Pennsylvania.

From reader reviews:

Sarah Ruff:

Why don't make it to be your habit? Right now, try to ready your time to do the important work, like looking for your favorite book and reading a book. Beside you can solve your short lived problem; you can add your knowledge by the publication entitled Introduction to Statistical Relational Learning (Adaptive Computation and Machine Learning series). Try to stumble through book Introduction to Statistical Relational Learning (Adaptive Computation and Machine Learning series) as your close friend. It means that it can to become your friend when you sense alone and beside regarding course make you smarter than previously. Yeah, it is very fortunated in your case. The book makes you much more confidence because you can know anything by the book. So , we need to make new experience in addition to knowledge with this book.

Christine Curnutt:

Reading a reserve tends to be new life style within this era globalization. With reading through you can get a lot of information which will give you benefit in your life. Having book everyone in this world can easily share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their very own reader with their story or their experience. Not only situation that share in the textbooks. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors on this planet always try to improve their ability in writing, they also doing some investigation before they write to their book. One of them is this Introduction to Statistical Relational Learning (Adaptive Computation and Machine Learning series).

Timothy Hardy:

Spent a free time and energy to be fun activity to perform! A lot of people spent their free time with their family, or their friends. Usually they undertaking activity like watching television, gonna beach, or picnic from the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your free time/ holiday? Can be reading a book might be option to fill your totally free time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to try look for book, may be the book untitled Introduction to Statistical Relational Learning (Adaptive Computation and Machine Learning series) can be excellent book to read. May be it is usually best activity to you.

Joyce Cannon:

Book is one of source of understanding. We can add our expertise from it. Not only for students but also native or citizen have to have book to know the update information of year to be able to year. As we know those ebooks have many advantages. Beside we all add our knowledge, also can bring us to around the world. By book Introduction to Statistical Relational Learning (Adaptive Computation and Machine Learning series) we can acquire more advantage. Don't you to be creative people? For being creative person

must want to read a book. Only choose the best book that acceptable with your aim. Don't possibly be doubt to change your life with this book Introduction to Statistical Relational Learning (Adaptive Computation and Machine Learning series). You can more appealing than now.
