For an introductory-level course in natural hazards

Natural Hazards uses real-life examples of hazards and disasters to explore how and why they happen—and what we can do to limit their effects. The text's up-to-date coverage of recent disasters brings a fresh perspective to the material.

The **Fourth Edition** provides a new active learning approach, a fully updated visual program and revised pedagogy tools that highlight hallmark concepts of the text. Students have access to an updated **Hazard City**, an online media resource which gives instructors meaningful, easy-to-assign, and easy-to-grade assignments in which students investigate virtual disasters in the fictional town of Hazard City.

This program will provide an interactive and engaging learning experience for your students. Here's how:

- **Provide a balanced approach to the study of natural hazards:** Focus on globalization of our economy, information access, and human effects on our planet in a broader, more balanced approach to the study of natural hazards.
- **Engage your students with "Hazard City":** Students work through 11 different assignments by stepping into the role of a practicing geologist and analyzing potential disasters in the fictional town of Hazard City.
- **Enhance understanding and comprehension of natural hazards:** Newly revised stories and case studies give students a behind the scenes glimpse into the lives of survivors, professionals and hazardous events.
- **Strong pedagogy tools reinforce the text's core features:** The new chapter structure and design organizes the material into three major sections to help students learn, digest, and review learning objectives.
