**Formation, characterization and mathematical modeling of the aerobic granular sludge (Springer Theses) Bing-Jie Ni**

Aerobic granular sludge technology will play an important role as an innovative technology alternative to the present activated sludge process in industrial and municipal wastewater treatment in the near future. Intended to fill the gaps in the studies of aerobic granular sludge, this thesis comprehensively investigates the formation, characterization and mathematical modeling of aerobic granular sludge, through integrating the process engineering tools and advanced molecular microbiology. The research results of this thesis contributed significantly to the advance of understanding and optimization of the bacterial granulation processes, the next generation of technology for cost-effective biological wastewater treatment.

Dr. Bing-Jie Ni works at Advanced Water Management Centre (AWMC) of The University of Queensland, Australia.

### **From reader reviews:**

#### **Louis Watson:**

Do you have favorite book? In case you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each reserve has different aim or goal; it means that guide has different type. Some people truly feel enjoy to spend their a chance to read a book. They can be reading whatever they have because their hobby is usually reading a book. Why not the person who don't like reading a book? Sometime, person feel need book if they found difficult problem or maybe exercise. Well, probably you should have this Formation, characterization and mathematical modeling of the aerobic granular sludge (Springer Theses).

#### **Amber Weitz:**

Playing with family in a park, coming to see the coastal world or hanging out with pals is thing that usually you have done when you have spare time, and then why you don't try thing that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Formation, characterization and mathematical modeling of the aerobic granular sludge (Springer Theses), you can enjoy both. It is good combination right, you still wish to miss it? What kind of hangout type is it? Oh seriously its mind hangout guys. What? Still don't buy it, oh come on its known as reading friends.

#### **Diana Chung:**

The book untitled Formation, characterization and mathematical modeling of the aerobic granular sludge (Springer Theses) contain a lot of information on the item. The writer explains her idea with easy means. The language is very clear and understandable all the people, so do certainly not worry, you can easy to read this. The book was compiled by famous author. The author will bring you in the new age of literary works. You can easily read this book because you can read more your smart phone, or program, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site and order it. Have a nice examine.

#### **Herman Hernandez:**

What is your hobby? Have you heard that question when you got scholars? We believe that that problem was given by teacher to the students. Many kinds of hobby, Everyone has different hobby. And you also know that little person including reading or as studying become their hobby. You have to know that reading is very important and also book as to be the factor. Book is important thing to increase you knowledge, except your own teacher or lecturer. You discover good news or update with regards to something by book. Numerous books that can you decide to try be your object. One of them is actually Formation, characterization and mathematical modeling of the aerobic granular sludge (Springer Theses).
