Basic Heat and Mass Transfer (Irwin Series in Marketing)

Anthony F. Mills

Basic Heat and Mass Transfer (Irwin Series in Marketing) Anthony F. Mills

Basic Heat and Mass Transfer has been written for undergraduate students in mechanical-engineering programs. The book is quite versatile. It can be used as the text for an introductory course during the junior or senior year, although the coverage is sufficiently comprehensive for use as a reference work in undergraduate laboratory and design courses. The emphasis throughout is on engineering calculations and each topic is developed to a point that will provide the student with the tools needed to practice the art of design. In addition, the student is introduced to design methodology for heat and mass transfer equipment.
