Basic Audiometry Learning Manual (Core Clinical Concepts in Audiology) Mark DeRuiter, Virginia Ramachandran

The Basic Audiometry Learning Manual, a volume in the Core Clinical Concepts in Audiology Series is designed to provide beginning clinicians and students with experiences and instruction in the art and science of clinical audiometry techniques. Learning objectives, review of concepts, observation exercises, guided practice, and review materials serve as catalysts for active learning of concepts and provide opportunity for utilization of fundamental audiometry methods. The learning manual can be utilized as a standalone tool, or in conjunction with the books of the complementary CCC Basic Audiometry Series to promote reflection, application, and assessment of learned information. The comprehensive content of the learning manual encompasses the breadth of audiologic evaluation, including history taking and patient communication, ear canal assessment and management, immittance, pure-tone testing, masking, speech audiometry, patient counseling, and report writing. Along with its family of texts in the Core Clinical Concepts in Audiology Series, the learning manual is designed to cultivate successful learning of students and entry-level professionals.
