Engineering GCSE

Michael H Tooley, Mike Tooley

Engineering GCSE Michael H Tooley, Mike Tooley

Mike Tooley's accessible, activity-based approach introduces students to engineering and the pivotal role it plays in the modern world, as well as providing opportunities to develop engineering skills and acquire the knowledge needed for the latest GCSE schemes from Edexcel, OCR and AQA. This book builds on the success of Mike Tooley's GNVQ and BTEC National Engineering texts, which have helped thousands of students to gain their first engineering qualification.

The text, case studies, activities and review questions included throughout this book are designed to encourage students to explore engineering for themselves through a variety of different learning experiences. The practical process of designing and making a product offers the chance to develop the skills of engineering drawing, basic electronics and workshop techniques. Case studies, and research work using the internet and other sources, introduce the wide variety of engineering sectors and employment, from the automotive industry to telecommunications.

With the first three chapters matched to the assessed units of the GCSE programme, the second edition also includes an additional topic-based chapter introducing the essential maths and science required for the successful study of engineering. All examples relate directly to engineering applications, emphasising the use of maths and science in the understanding of fundamental engineering concepts. New topics include: units; formulae; measurement; data; linear and angular motion; force, mass and acceleration; and properties of engineering materials.

Mike Tooley is formerly Director of Learning at Brooklands College, Surrey, and is the author of many best-selling engineering and electronics books.

From reader reviews:

Jennifer Frederick:

As people who live in the particular modest era should be update about what going on or information even knowledge to make all of them keep up with the era and that is always change and advance. Some of you maybe will update themselves by reading through books. It is a good choice for you personally but the problems coming to a person is you don't know what one you should start with. This Engineering GCSE is our recommendation to cause you to keep up with the world. Why, because book serves what you want and want in this era.

Neil Myers:

Playing with family in a very park, coming to see the water world or hanging out with close friends is thing that usually you might have done when you have spare time, then why you don't try point that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Engineering GCSE, it is possible to enjoy both. It is fine combination right, you still wish to miss it? What kind of hangout type is it? Oh come on its mind hangout fellas. What? Still don't buy it, oh come on its known as reading friends.

Shirley Martins:

In this period globalization it is important to someone to receive information. The information will make a professional understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher which print many kinds of book. The particular book that recommended for your requirements is Engineering GCSE this reserve consist a lot of the information of the condition of this world now. This particular book was represented how do the world has grown up. The vocabulary styles that writer use for explain it is easy to understand. The particular writer made some analysis when he makes this book. Honestly, that is why this book ideal all of you.

Trisha McClain:

In this era which is the greater individual or who has ability to do something more are more treasured than other. Do you want to become one among it? It is just simple approach to have that. What you are related is just spending your time almost no but quite enough to enjoy a look at some books. Among the books in the top listing in your reading list is Engineering GCSE. This book that is certainly qualified as The Hungry Hills can get you closer in getting precious person. By looking right up and review this guide you can get many advantages.
