## **Lab Manual for Physical Science** Bill Tillery

The *laboratory manual*, written and classroom-tested by the author, presents a selection of laboratory exercises specifically written for the interests and abilities of non-science majors. There are laboratory exercises that require measurement, data analysis, and thinking in a more structured learning environment, while alternative exercises that are open-ended “Invitations to Inquiry” are provided for instructors who would like a less structured approach. When the laboratory manual is used with *Physical Science*, students will have an opportunity to master basic scientific principles and concepts, learn new problem-solving and thinking skills, and understand the nature of scientific inquiry from the perspective of hands-on experiences. The *instructor’s edition of the laboratory manual* can be found on the *Physical Science* companion website.
